

VOTING AND ELECTION SYSTEM.

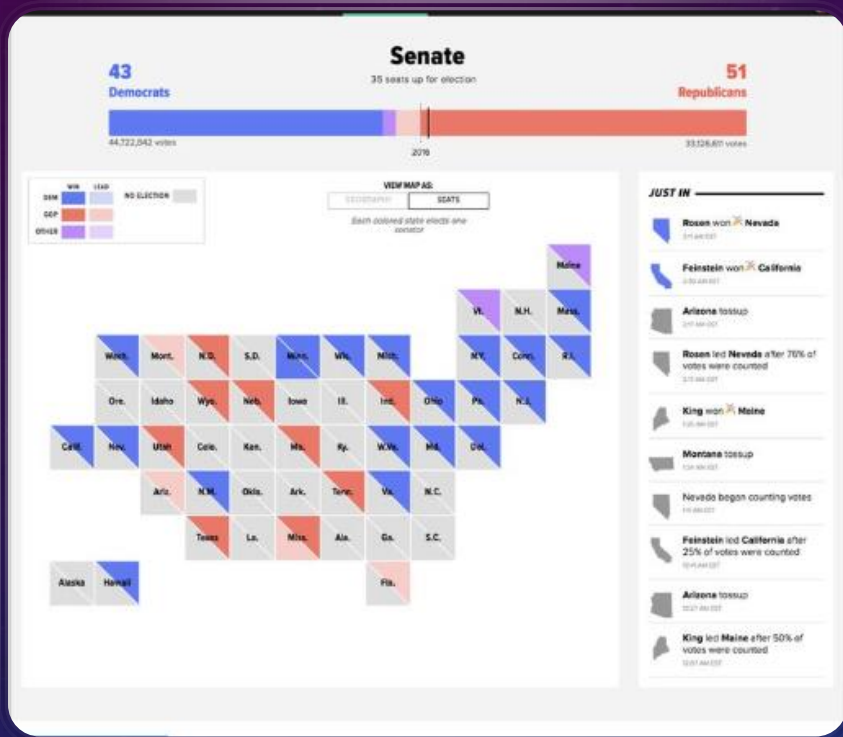

- **Objective:** Develop a secure and efficient voting system to manage elections digitally.
- **Target users:** Election officials, voters, government agencies.
- **Expected benefits:** Prevent election fraud, ensure transparency, provide real-time vote counting.

MAIN DATABASE ENTITIES.

- **Voters:** Stores voter details (name, ID, eligibility status)
- **Candidates:** Contains information about election candidates.
- **Elections:** Tracks election types, dates, and rules.
- **Votes:** Records each vote cast and links it to a voter and candidate.
- **Results:** Stores final vote counts and winner declaration.

BENEFITS OF THE SYSTEM.

- **Prevents voter fraud:** Uses secure digital authentication.
- **Ensures transparency:** Real-time vote tracking and monitoring.
- **Reduces manual work:** Automates vote counting and reporting.
- **Faster result declaration:** No delays in election outcomes.
